Program 12. Analysis of Amazon Prime Dataset

i) **Create a Donut chart to show the percentage of movie and tv shows**
ii) **Create a area chart to shows by release year and type**
iii) **Create a horizontal bar chart to show Top 10 genre**
iv) **Create a map to display total shows by country**
v) **Create a text sheet to show the description of any movie/movies.**
vi) **Build an interactive Dashboard.**

SOLUTION:

i) **Create a Donut chart to show the percentage of movie and tv shows**

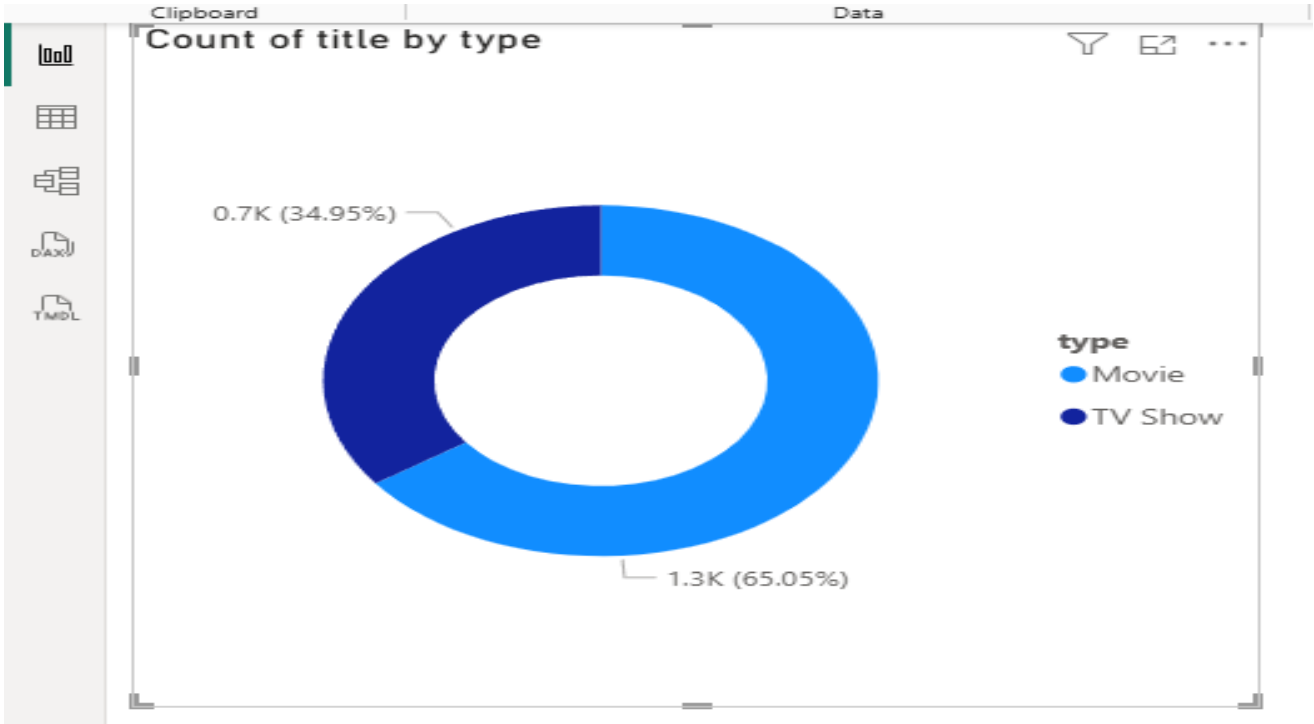
Create the Donut Chart Visual
• Go to **Visualizations pane**
• Select **Donut chart** icon

Add fields
• Drag **Type** → **Legend**
• Drag **Title** (or ID) → **Values**
• Click dropdown on **Title** → choose **Count** (Count of Title)

Filter to only Movie and TV Show
• Drag **Type** into **Filters pane**
• Check **Movie** and **TV Show** only
(If your dataset already only has 2 categories, this step is optional)

Display percentage labels
• In **Format Visual** options
• Expand **Detail labels**
– Label style: **Category, % of total**
– Turn labels ON
– Increase **Text size** for good readability
– Optional: change **Inside** placement

Color formatting (make it professional)
• Format Visual → **Colors**
• Choose contrasting colors like
Movie = Blue
TV Show = Light Blue.



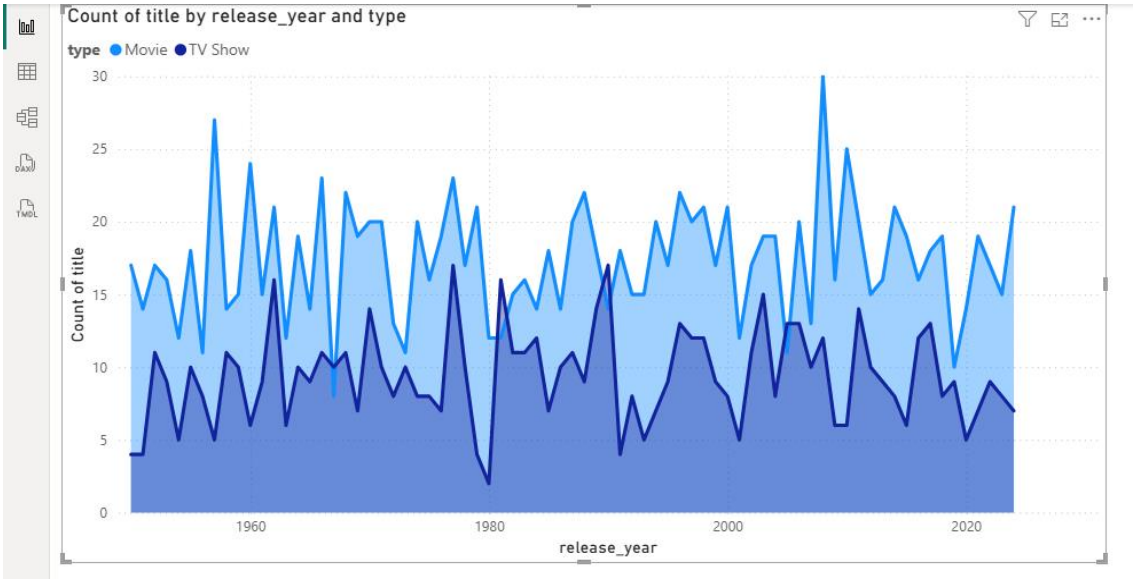
ii) Create a area chart to shows by release year and type

Select the Area Chart Visual
• Visualizations pane → click **Area Chart** icon

Drag fields to build the chart
• Drag **Release Year** → **X-axis**
• Drag **Title** → **Values**
• Click dropdown on Title → **Count**
(Count of Title = number of shows in each year)

Break it down by category (stacked/color by Type)
• Drag **Type** → **Legend**
(Movie vs TV Show)

Formatting to make it look professional
• Sort → by **Release Year** (ascending)
• Format Visual →
– **Data colors**: choose distinct colors
– **Y-axis** title: "Number of Shows"
– **X-axis** title: "Release Year"
– Enable **Data labels** only if clear
– **Marker** OFF for cleaner visuals



iii) Create a horizontal bar chart to show Top 10 genre

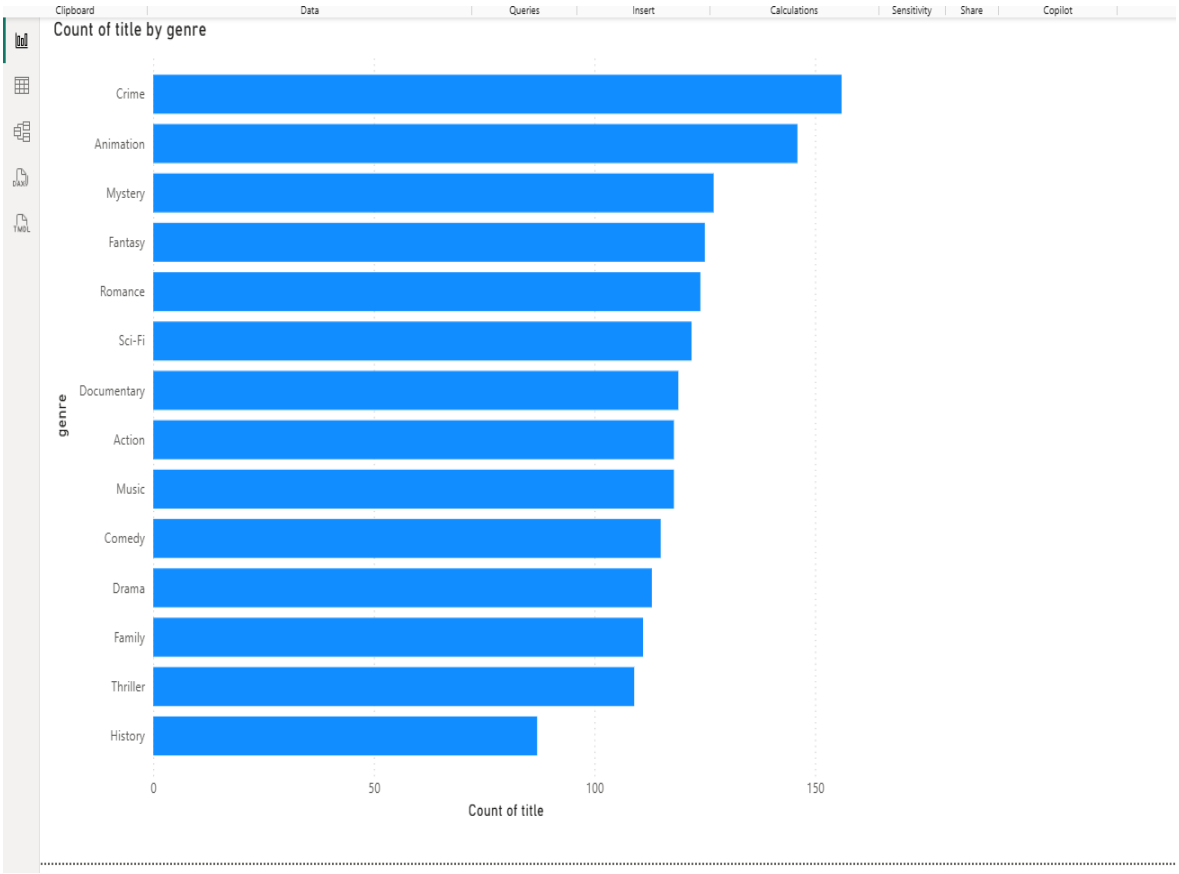
Horizontal Bar Chart: Top 10 Genres

Insert a Bar Chart
• From the Visualizations pane
• Select **Stacked bar chart** (horizontal bars)

Add the data fields
• Drag **Genre → Y-axis**
• Drag **Title → X-axis**
• Click dropdown on Title → choose **Count**
(Count of Title gives number of shows for each genre)

Sort and keep only Top 10
• Click the three dots on the chart
• Sort by **Count of Title** descending
• Filters pane → Under Genre
Expand **Top N filter**
Top = 10
By value = Count of Title
Click **Apply filter**

Make it clean and readable
• Format Visual →
Category labels text size: increase a little
Data labels: ON



Create a map to display total shows by country

Insert a Map Visual
• Visualizations pane → click **Map** (globe icon)

Add fields to the Map
• Drag **Country** → **Location**
• Drag **Title** → **Size**
• Click dropdown on **Title** → select **Count**
(Count of Title = total number of shows)

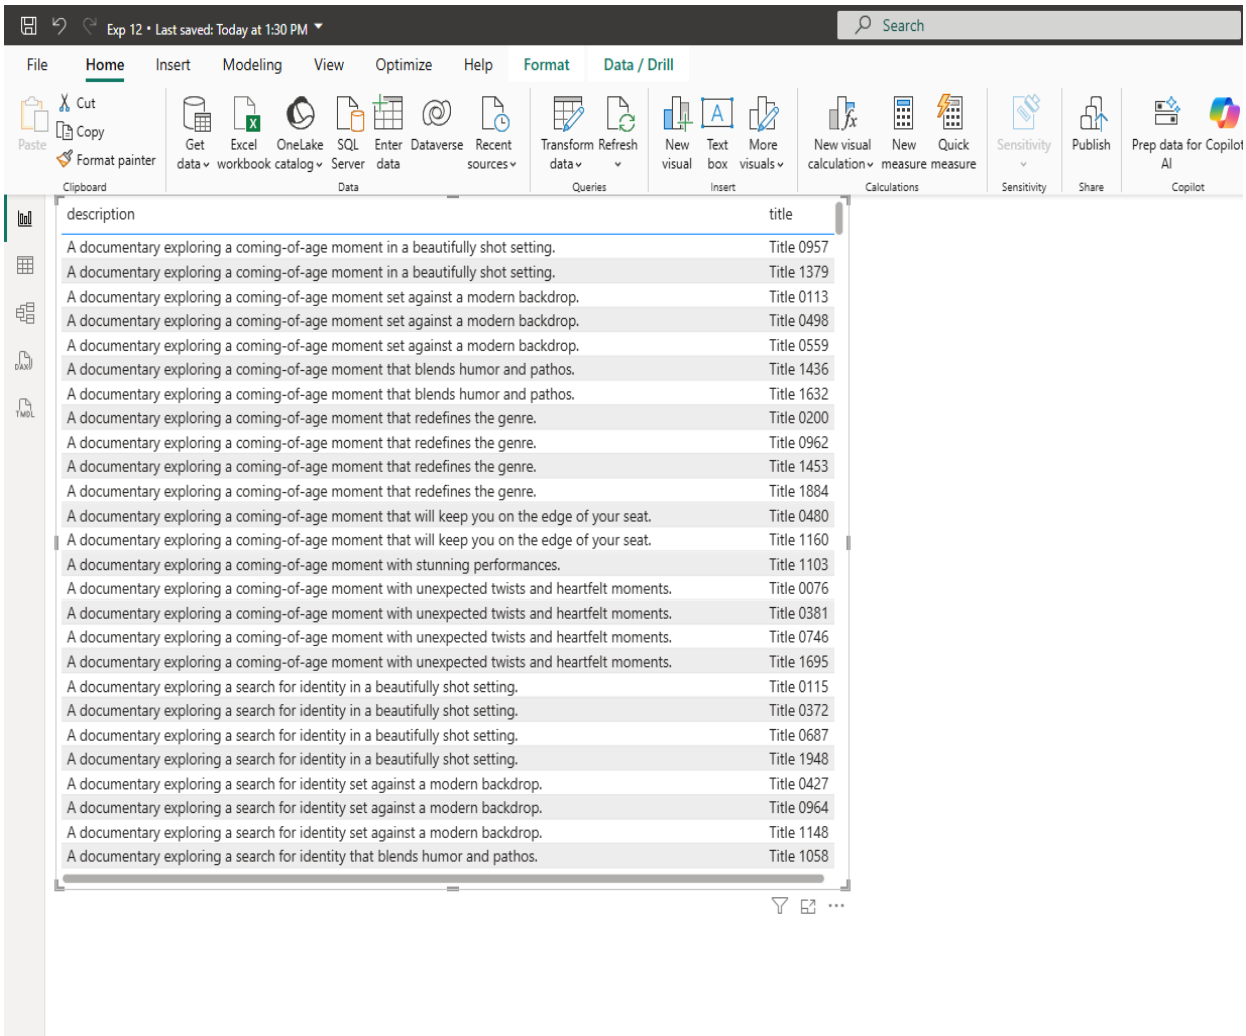
Enable map display
• Ensure that Power BI recognizes Country as geographic data
If not:
- Go to **Data View**
- Select **Country** column
- Column tools → **Data Category** = "Country/Region"

Create a text sheet to show the description of any movie/movies

Ensure your dataset has a **Description** column for each movie/TV show.

Choose Table from the visuals and check the title and description columns.

You can add slicer to search by title to get the description.



description	title
A documentary exploring a coming-of-age moment in a beautifully shot setting.	Title 0957
A documentary exploring a coming-of-age moment in a beautifully shot setting.	Title 1379
A documentary exploring a coming-of-age moment set against a modern backdrop.	Title 0113
